

information on the admission test.

The admission test for all Bachelor's degree programs takes approximately 80 minutes and is conducted online. The admission test consists of four sections focused on logical and deductive reasoning, numerical skills, English language skills, and personality factors relevant to studying skills.

1 admission test procedure.

We will provide you with a time frame for the test in the course of the application process, in which you can determine a time slot that suits you. You will receive detailed information and the link to the admission test in a timely manner by a separate e-mail.

The exam takes approximately 80 minutes; there are no breaks allowed. Instructions are provided throughout the exam to help applicants are guided through each section. The exam is to be taken independently in a quiet room without distractions. No aids of any kind are to be used during the exam.

2 admission test sections.

At the beginning of each section, a practice example is provided. The test questions are adaptive, i.e., the level of difficulty of the questions is based on the extent to which the previous questions were answered correctly. Therefore, the questions might become increasingly difficult if you answer them successfully.

The online admission test consists of the following test sections:

- **FIGURAL INDUCTIVE REASONING**

This section is to test your ability to recognize the general rules on which individual questions are founded. This ability helps you to acquire new competences and recognize interconnections between different disciplines.

This set of questions is about being able to identify rules. You will be presented with a table of three rows and three columns containing altogether eight figures. These are arranged according to different rules. Your task will be to identify these rules and determine the ninth figure in each question.

Practice example

You can practice the task yourself now. Choose the correct answer and then press "Next".

• MATHEMATICAL FLEXIBILITY

Questions in this category will require you to determine the arithmetic operation (addition, subtraction, multiplication or division) to be applied to obtain a correct result. You will have to consider the order of operations, i.e. multiplication and division first, and then addition and subtraction, in order to be able to replace the question marks with the correct operations.

Instructions...

You can try the task for yourself now. Press the blue boxes to select the respective calculation.

$$2 \text{ ? } 1 \text{ ? } 2 = 5$$

- **ENGLISH LANGUAGE SKILLS**

(1) Grammar

This section will present you with several incomplete sentences that have to be completed in a grammatically correct way. You will be asked to choose the most appropriate word or phrase from multiple options.

Practice example

Try this sample question:

According to the law an employee's salary _____ on a monthly basis.

- is paid
- is being paid
- is payed
- is being payed

When you have selected your answer, please press "Next".

(2) Vocabulary

This set of questions will confront you with a series of sentences in each of which one word is underlined. You will be asked either to find a word with a similar meaning or to pick the respective antonym from a list of options.

Practice example

Try this sample question:
Find a word with a **similar** meaning.

East of the Rocky Mountains, the annual rainfall decreases **substantially** from the west of the Rocky Mountains.

- fundamentally
- slightly
- completely
- apparently

When you have selected your answer, please press "Next".

- **PERSONALITY TRAITS**

This section will require you to indicate, on a four-point scale, to which extent you feel that a phrase or word is typical for you. “Not typical” means that the respective statement does not apply to you at all, or only to a limited extent, whereas “typical” is to show that the statement applies to you at least in most situations.

There is no right or wrong answer. The personality test is merely about getting to know you and your potential.

Introduction...

You will now see some descriptive words or phrases that relate to personality traits. Please indicate the extent to which you feel that they are typical of you.

You have the following answer options to choose from:

untypical
for me

rather untypical
for me

rather typical
for me

typical
for me

'Untypical' means that the description applies to you only rarely or not at all; *'typical'* means that the description applies to you in most situations.
